

# CIVICON

Civil & Structural Consulting Engineers

## INTRODUCTION

Civicon Consulting Engineers was established in 1998 to provide consulting services in Civil and Structural Engineering. We have worked hard to develop the fledgling company into the well-respected firm it is today.

Civicon Consulting Engineers has developed into a successful company, with a proven track record, not only in Nelspruit, but also throughout the Lowveld and Mpumalanga. We offer a high quality service in all the fields of Civil and Structural Engineering, as well as project management.

Civicon Consulting Engineers' well-rounded, experienced team provides the capabilities of a large firm with the attention and reliability of a smaller firm. Our designs are constructible, cost-effective, and uphold the integrity and goals of the project. We recognize that a project's success depends on the construction costs, so we practice value engineering for every project, while ensuring practical and safe designs for both the client and the public.

## VALUES

Civicon Consulting Engineers are committed to the following values:  
Integrity and honesty • Timely Service • Quality work • Good value

## FACILITIES & TEAM

Civicon Consulting Engineers is a small office with low overheads but with experienced personnel that has been involved in almost all facets of civil engineering consulting and project management. Our facilities include the following:

- Two experienced engineering partners with more than 50 years of combined experience
- Contingent of highly skilled draughting personnel
- Financial and administrative personnel
- Software include among other things: Autocad, Prokon, Model Maker, Road Maker, Pipe Maker, Wadiso, as well as MS Project

- 

We are able to supply services in almost all aspects of civil and structural engineering at a great value and timely service while never compromising on quality of work and/or end product. Our clients are mostly Nelspruit and White River based architects, property developers, builders, property owners, other consulting engineers, concrete system manufacturers as well as schools, governments and municipalities in the Lowveld and Mpumalanga region. We also regularly do work further afield though. We have done work as far as Cape Town, Richards Bay, Tzaneen, Ermelo, Witbank, Mkhondo / Piet Retief and Maputo. We regularly get assignments in Leopards Creek, Highlands Gate Dullstroom, Eden Private Nature Reserve, Mjejane, Marloth Park, Hoedspruit, Hazyview, Malelane, Hectorspruit, Bushbuck Ridge and Sabie among others.

#### **Services offered are the following:**

- Structural Engineering (multi storey buildings, residential, commercial, industrial, office, schools, flats, hostels as well as civil structures complete with reinforced concrete, rib-and-block systems, coffer slab systems and/or structural steel)
- Civil Engineering (roads, reservoirs, bulk water & sewer lines, water, sewer & stormwater reticulation, water and sewer pumping stations, water and sewage treatment plants)
- Government & Institutional Infrastructure (streets, stormwater, water & sewer reticulation, schools, offices, institutional buildings)
- Foundation Solutions (piling, raft foundations, modified normal foundations, soil rafts)
- Bulk Earthworks (for residential, commercial, industrial, office or governmental projects)
- We are truly a multidisciplinary office. We have been involved in almost every aspect of civil and structural engineering design, supervision, contract management and administration.
